

# VHF Net Script

**CQ CQ CQ** Stand by for the net.

This is the Nassau County Amateur Radio Society net on the W4NAS Repeater system located in Nassau County, Florida. This is a controlled net and I will be net control for tonight, my name is [**your name & callsign**].

If there is any emergency or priority traffic please come now.

Nothing heard.

This net is held every Thursday night at 1930 on 147.000 mhz with a negative offset and a tone of 127.3. The back-up frequency for this net is 146.835 with a negative offset and a tone of 127.3. In the event of a repeater failure or malfunction please switch to the back-up frequency for roll-call. This is a linked repeater system, with several remote sites therefore when transmitting please key your microphone for one second before speaking to ensure that the beginning of your transmission is not cut-off.

For the Initial check in of this net, you are authorized to use your call sign suffix instead of your complete call sign.

I will now call for the Nassau County Emergency Coordinator to check in.

I will now call for any Nassau County Assistant Emergency Coordinators wishing to check in.

I will now call for any Emergency Coordinators or Assistant  
Emergency

Coordinators from counties other than Nassau wishing to check in

Does the Emergency Coordinator or any Assistant Emergency  
Coordinator have any announcements or traffic for the net?

This is [**your callsign**]

I will now take regular check-ins for the net. All licensed amateur  
radio operators are encouraged to check-in. You are not required to  
be a part of the NCARS organization to participate in this net.

Please give your call sign suffix when you check in. If you have a  
single letter suffix, please use the call sign area number plus the  
single letter. I will return to you after roll call for any comments and  
traffic. When your suffix group is called, please check-in in groups  
of 3-4 at a time, I will acknowledge your group and continue  
through the entire alphabet.

Echolink check-in will be following the initial check-ins.

We will start with any call sign suffix between Alpha through  
Foxtrot. Please come now. (**repeat for more check ins**)

Next we will take check-ins with a Golf through Lima suffix. Please  
come now. (**repeat for more check ins**)

Next we will take check-ins with a Mike through Romeo suffix.  
Please come now. (**repeat for more check ins**)

Next we will take check-ins with a Sierra through Zulu suffix. Please come now. (repeat for more check ins)

And finally, we will take any check-ins via EchoLink – (Node: 146835). I will pause 10 seconds for them to check-in now.

This is [your callsign]

We will now return to each check-in for comments and traffic. Please give your name, full call sign, location, radio transmit power and antenna height. If you have comments or traffic please give them as well. (call all check ins)

This is [your callsign] for the Nassau County Amateur Radio Society Net on the W4NAS Repeater system located in Nassau County Florida.

Do we have any last minute check-ins for the net

This concludes tonight's net; As a reminder, this net meets every Thursday at 1930 on the W4NAS 147.000 mhz repeater system. The Nassau County Amateur Radio Society meets in-person at the Nassau County Moose Lodge on Highway 17 the second Wednesday of each month...social starts at 6:30 followed by a meeting/program at 7:00, or as posted on our website, [www.ncfars.com](http://www.ncfars.com), please log-in for details.

I am now returning the repeater to normal amateur use.

This is [your callsign], clear.
